

User Stories – Inventory Module

Actor	User Story
Inventory Manager	As an Inventory Manager, I want to manage products (add, edit, deactivate) so that product information stays accurate and up-to-date.
	As an Inventory Manager, I want to manage locations (warehouses & storage bins) so that I can track exactly where items are stored.
	As an Inventory Manager, I want to view current stock so that I can monitor stock levels across products and locations.
	As an Inventory Manager, I want to create stock transfers so that I can move products between locations.
	As an Inventory Manager, I want to create stock transfers so that I can move products between locations.
	As an Inventory Manager, I want to assign stock transfers to warehouse staff so that responsibilities are clear and transfers are executed properly.
	As an Inventory Manager, I want to adjust stock so that I can correct discrepancies caused by audits, errors, or damaged goods.
	As an Inventory Manager, I want to reorder stock so that I can prevent stockouts and maintain optimal inventory levels.
Warehouse Staff	As a Warehouse Staff, I want to execute assigned stock transfers so that products can be moved between warehouses or bins as required.
	As a Warehouse Staff, I want to perform stock counts so that I can verify physical inventory against system records.
	As a Warehouse Staff, I want to scan inventory (barcode/RFID) so that I can update stock quickly and accurately.
System	As a System, I want to update stock records automatically (transaction log + balance) whenever stock is received, transferred, adjusted, or counted so that data stays accurate.
