

User Stories – Inventory Module

Actor	User Story
Inventory Manager	As an Inventory Manager, I want to manage locations (warehouses) so that I can know exactly where products are stored.
	As an Inventory Manager, I want to manage products (add, edit, deactivate) so that I can keep product information up-to-date.
	As an Inventory Manager, I want to view current stock so that I can monitor stock levels.
	As an Inventory Manager, I want to reorder stock so that I can prevent stockouts.
	As an Inventory Manager, I want to transfer stock between warehouses so that I can balance inventory.
	As an Inventory Manager, I want to adjust stock so that I can correct discrepancies after audits or errors.
Warehouse Staff	As a Warehouse Staff, I want to perform stock count so that I can verify physical inventory.
	As a Warehouse Staff, I want to scan stockroom so that I can update stock quickly with barcode/RFID.
System	As a System, I want to update stock transactions whenever stock is reordered, transferred, adjusted, or scanned so that inventory records stay accurate automatically.
