

User Stories – Manufacturing Module

Actor	User Story
B2B Customer	As a B2B Customer, I want to place a B2B order so that I can purchase products directly from the manufacturer.
Production Manager	As a Production Manager, I want to manage manufacture orders so that I can schedule and control the production process.
	As a Production Manager, I want to calculate the cost of goods sold so that I can understand production costs and profitability.
	As a Production Manager, I want to monitor production progress so that I can track the status of orders and ensure timely delivery.
	As a Production Manager, I want to manage products so that I can update product details, specifications, and production requirements.
	As a Production Manager, I want to manage bills of materials (BOMs) so that I can define components and resources needed for each product.
Warehouse Staff	As a Warehouse Staff, I want to assemble products so that I can complete the manufacturing process and prepare items for delivery.
	As a Warehouse Staff, I want to scan barcodes so that I can update inventory quickly and accurately.
	As a Warehouse Staff, I want to manage inventory so that I can maintain accurate stock levels and avoid shortages.
	As a Warehouse Staff, I want the system to reorder stock automatically so that I don't run out of critical materials.
System Integrator	As a System Integrator, I want to integrate with external systems so that manufacturing data can synchronize with ERP, accounting, or supply chain platforms.
